

ABISAI RUIZ LOPEZ

Full-Stack Software Developer

PROFESSIONAL PROFILE

Passionate about data structures, automation, and scalable system design. Proven experience in Full-Stack development combined with strong analytical skills developed through scientific and technological research. Focused on elevating the standard of digital experiences by integrating technical rigor and strict attention to detail.

EDUCATION

Computer Systems Engineering | Instituto Tecnológico de Tepic. **Graduation: December 2026.**

- **Specialization: Web Development and Cross-Platform Applications.**

Computer Support and Maintenance Technician | CECyTEN San Felipe Aztatán. (2018 - 2021).

TECHNICAL AND RESEARCH EXPERIENCE

Academic Researcher - Business Clusters for SMEs | DELFIN Program (Guadalajara) | 2026

- Developed software for data extraction and analysis from INEGI, facilitating the study of SME evolution.
- Analyzed growth trends and business displacement through the processing of historical INEGI data.

Software Developer / Project Manager - Marakame Institute | Jan – Jun 2026

- Developed a system operating within an institutional intranet using Agile methodologies.
- Implemented security controls for handling sensitive information.
- Led a development team to ensure project deliverables were met on time with agile methodologies.

Full-Stack Web Developer - Electronic Store | (2025) Sep – Dec

- Optimized billing and payment processes through API integration.
- Implemented Firebase for real-time data synchronization.
- Managed deployments and CI/CD pipelines in Vercel, ensuring production stability.

Full-Stack Python Developer - Prolock | (2025) Sep – Dec

- Designed a virtual electronic lock prototype in Proteus.
- Developed a custom programming language based on Python to program advanced functions into electronic locks using the virtual prototype.

Academic Researcher - Benefits of *Trichoderma sp.* in Corn | DELFIN Program (Tepic) | 2025

- Conducted scientific research on the impact of *Trichoderma sp.* on corn crops.
- Developed a software prototype to record and analyze research outcomes.

SKILLS AND TECH STACK

- **Programming Languages:** Java, Python, JavaScript, Dart (Flutter), SQL, Assembly x86.
- **Technologies:** Node.js, React, Astro, Firebase, MongoDB, SQL Server, Docker, Linux.
- **Tools:** Git, Vercel (CI/CD), Figma, Android Studio, VS Code.
- **Languages:** Spanish (Native), English (Intermediate).

CERTIFICATIONS AND HONORS

- [UX / UI Designer by Google – Coursera \(2026\)](#)
- Google Cloud Engineer Certificate / AWS - Cloud Technology and Artificial Intelligence (Scholarship Applicant)
